ILLUMINATED WALLS WITH BASE PLATES

When it comes to LED presentation, freestanding illuminated walls can be rightly called a true classic. Depending on their size, they come with two or three base plates to make sure the construction is firm and stable.

Freestanding illuminated walls can be used in a multitude of areas including trade shows, events and exhibitions, museums, point of sale and foyers.

Our standard widths of 1000mm, 2000mm, 3000mm and 4000 mm with a regular height of 2480mm allow for a great many illuminated wall solutions.

Of course, larger custom sizes and special designs can also be realized. Just ask us – we will be happy to advise you.

ITEM NO.	DIMENSIONS (W × H)
OL 1210	1000 x 2480 mm
OL 1220	2000 x 2480 mm
OL 1230	3000 x 2480 mm
